DISTRICT OFFICES IN NEVADA

Most inquiries regarding public land matters should be directed to the appropriate BLM District Office as these offices have the best functional knowledge of programs underway within District boundaries.

ELKO DISTRICT

District Manager: J. Kent Giles — 738-7111
2002 Idaho Street
Elko NV 89801

WINNEMUCCA DISTRICT

District Manager: Eugene A. Moore — 623-3676
P. O. Box 71
Winnemucca NV 89445

CARSON CITY DISTRICT

District Manager: Horace E. Jones — 882-1631
801 N. Plaza Street
Carson City NV 89701

ELY DISTRICT

District Manager: Richard H. LeDosquet — 289-4865
Pioche Star Route
Ely NV 89301

LAS VEGAS DISTRICT

District Manager: Dennis E. Hess — 385-6403
P. O. Box 3
Las Vegas NV 89101

BATTLE MOUNTAIN DISTRICT

District Manager: Harry R. Finlayson — 635-2376
P. O. Box 194
Battle Mountain NV 89820

This booklet contains information and statistics about the Bureau of Land Management in Nevada. Most of the figures pertain to Fiscal Year 1971 (July 1, 1970 to June 30, 1971). Information in this book is current as of June 30, 1971. As one means of conserving natural resources, this booklet is printed on recycled paper.

LANDS AND MINERALS

Lands and minerals activities are the concern of both the Division of Resources and the Division of Technical Services:

Lands and Minerals Operations, Division of Technical Services, provides realty and leasing services as necessary to support Federal programs to meet State and local needs, to meet obligations to the general public under existing legislation, to conduct the mineral leasing program, and to support the land classification effort. Specific duties relate to providing the adjudication of applications for public lands, issuing land patents, and conducting the BLM's access-acquisition program.

Lands and Minerals, Division of Resources, treats lands and minerals as true resources and provides training, professional guidance and technical advice to district offices. Specific duties include working with other technical disciplines such as recreation and range management, determining which multiple uses are practical in given areas of Nevada, and helping to formulate long- and short-range plans.

In Fiscal Year 1971, the Bureau of Land Management received 18,067 acres of land through private exchanges, compared with 42,732 acres transferred from Federal ownership. In FY 71 there were 424 mineral leases issued on a total of 370,494 acres, compared to 350 mineral leases on a total of 367,377 acres in FY 70.

LAND DEEDS ISSUED

Total	227	265,682	$ 7,581.00

RANGE MANAGEMENT

Goals of the range management program are to improve all public land likely to be retained in Federal ownership and to enhance forage production by implementing Allotment Management Plans. These plans are based on BLM and rancher cooperation and planned livestock use of public land. A type of range management called Rest Rotation Grazing has proven thus far to be effective at revitalizing public lands with high but unrealized grazing potential.

The charts below are based on Grazing Years 1970 and 1971; Grazing Year 1971 ran from March 1, 1970, to February 28, 1971. An Animal Unit Month is a measure of the food needed to feed one cow or five sheep for one month, Section 3 licenses are in grazing districts, and Section 15 leases are outside of established grazing districts.

FORAGE PROVIDED

FIRE PROTECTION AND REHABILITATION

The fire control program concentrates on fire protection in areas having high resource values or great risk of fire damage. Teaching people to be careful with fire so fewer man-caused fires are started, and the building of an efficient statewide fire-fighting organization are integral parts of this program.

Any actions taken by BLM fire crews responding to reported fires are called fire actions. Fire actions include false alarms, fires on public lands, and fires on private lands which could spread to public lands if left to burn uncontrolled. BLM fire actions are classified by the size of the area burned, as shown below. The BLM fire actions during Calendar Year 1970 were as follows:

DISTRICT	NUMBER OF FIRE ACTIONS IN VARIOUS SIZE CLASSES							FALSE		ACREAGE BURNED		
	A	B	C	D	E	F	G	ALARM	TOTAL	BLM	OTHER	TOTAL
Elko	24	23	6	0	1	0	0	7	61	132	521	653
Winnemucca	44	25	9	1	3	0	0	10	92	1,986	128	2,114
Carson City	59	19	4	0	1	1	0	26	110	1,134	1,930	3,064
Ely	55	9	1	1	0	0	0	7	73	253	19	272
Las Vegas	84	11	1	1	0	0	0	16	113	237	0	237
Battle Mountain	16	1	0	1	0	0	0	5	23	180	0	180
Total	282	88	21	4	5	1	0	71	472	3,922	2,598	6,520

Size classes:
- A 0.00 to .25 acres
- B .26 to 9 acres
- C 10 to 99 acres
- D 100 to 299 acres
- E 300 to 999 acres
- F 1,000 to 4,999 acres
- G 5,000 or more acres

The number of fires on public lands in Calendar Year 1970 increased 52% over Calendar Year 1969, and the total acreage burned increased 220%. In Calendar Year 1970 fires burned 3,922 acres of public land and 2,598 privately-owned acres. Less than ten acres were burned by 370 fires, while 31 fires burned more than ten acres. The cost of extinguishing the smaller fires averages $1,000 per fire, as compared to $30,000 for the average fire of more than ten acres.

Each BLM District staffs a fire organization which includes a fire dispatch office and fire truck units. All BLM fire control units are connected by radio or by telephone, and fire dispatch offices have facsimile machines to send maps and fire weather to other offices. Fire actions occur mainly from May 15 to October 31.

SOIL AND WATERSHED MANAGEMENT

Long-term objectives of the watershed program are to stabilize watersheds, to protect them from further deterioration, and to develop or improve watershed conditions to meet specific needs. Typical needs include greater water quality or quantity, reduction of flood damage, and reduction of sediment.

Short-range goals are accomplished through resource development and conservation programs which apply land treatments such as grass seeding, brush control, or fencing that will:

Control or prevent soil erosion;

Restore soil productivity to enhance other resource use values such as fish and wildlife development, livestock forage, timber production, outdoor recreation, and other esthetic values on watershed areas;

Enhance water values, including improvements in water quality, renewal of ground water supplies, control of flood and sediment, protection of public health, and stabilization of local economies.

Resource development and conservation work done in Fiscal Year 1971, and the total work done since 1936 is shown in the following tables.

	FY 70				FY 71

Total	7,370	8,216	5,347	8,014	8,419	9,489	46,855

1/ 3,225 acres included in this total are lands leased under Section 15 of the Taylor Grazing Act.

2/ 118,000 acres included in this total are lands leased under Section 15 of the Taylor Grazing Act.

RECREATION MANAGEMENT

Long-term objectives of the recreation management program are to manage public lands for recreational use, to develop guidelines for off-road vehicle use, to develop areas of regional and national significance, to protect antiquities, and to protect the environmental and natural values of Nevada public lands.

Horseback riding, hiking, camping, hunting, fishing, sightseeing, winter and water sports, and off-road vehicle use are popular recreational uses of public lands. As the need for recreation management has grown on Nevada's public lands, the BLM has provided for increased numbers of visitors by implementing recreation plans and constructing new recreation facilities. Some areas identified or designated specifically for recreation use include a 9,000-acre Las Vegas Dunes Off-Road Vehicle Area, the 70,000-acre Red Rock Canyon Recreation Lands, several natural areas containing unique flora or fauna, and many historical or archeological sites. Seven developed campgrounds, listed below, have been built in areas of high visitor use.

DISTRICT	NAME OF SITE	NUMBER OF CAMPSITES	NUMBER OF PICNIC SITES
Elko	Ruby Marsh*	35	--
	Wildhorse*	15	22
Winnemucca	--------	--	--
Carson City	Sportsman's Beach	--	17
	Tamarack Point	20	--
Ely	Meadow Valley Wash	4	--
Las Vegas	Willow Spring	--	20
Battle Mountain	Hickison Petroglyph	16	5

* Federal Recreation Area Permit or daily fee admits visitors

Intensive recreation management in Fiscal Year 1971 centered around the Red Rock Recreation Lands, which had nearly 800,000 visitors. Road construction and additional facilities are planned for this area.

BUILDINGS AND YARDS

Objectives of the buildings and yards program are primarily to maintain in safe condition all the buildings BLM uses. When funds are available, a district complex for the Las Vegas District will be constructed. The Las Vegas Office has been moved into the old Post Office in downtown Las Vegas and is separated from the storage and fire yard by six miles of heavily travelled streets.

CADASTRAL SURVEY

The long-range goal of the Cadastral Survey program is to completely survey Nevada's public lands, a task at which it has been working since 1861.

Immediate goals are to provide surveys needed to support public programs, do those surveys which are required by law, and to resurvey where necessary to identify the boundaries of public lands so these lands can be properly managed. Resurveys are needed on about 29 million acres or about 1,250 townships, as the original surveys were completed prior to 1910 under the contract system and little evidence remains of corner monuments placed at that time. Nearly 19 million acres or about 850 townships are still unsurveyed.

During Fiscal Year 1971, five BLM survey crews surveyed section lines enclosing 298,249 acres, or about 466 square miles. Acres surveyed were those of highest priority. If surveying continues at its present rate the completion of this work on Nevada public lands will take until approximately 2200 A.D. This work is significant both in terms of today's management needa on the public lands and as a basis for resolving future yet-to-be-determined needs.

The Cadastral Surveys are the official government survey of public lands conducted by the Cadastral Survey Branch of BLM's Nevada State Office. Survey accomplishments for Fiscal Years 1970 and 1971 were:

ITEM	FY 70	FY 71
Acres Surveyed	52,443	43,447
Acres Resurveyed	284,665	254,802
Acres Unsurveyed	18,869,505	18,826,058
Corners Remonumented--U.S. Forest Service	0	0
Mineral Surveys	0	8*
Plats Accepted	22	21
Acres Surveyed to present	51,385,455	51,428,902

* Eight surveys consisting of 93 lodes

BUILDINGS AND YARDS

Objectives of the buildings and yards program are primarily to maintain in safe condition all the buildings BLM uses. When funds are available, a district complex for the Las Vegas District will be constructed. The Las Vegas Office has been moved into the old Post Office in downtown Las Vegas and is separated from the storage and fire yard by six miles of heavily travelled streets.

As the Nation's principal conservation agency, the Department of the Interior has basic responsibilities for water, land, mineral, fish, wildlife, forest, range, and recreational resources. Indian and Territorial affairs are other major concerns of America's "Department of Natural Resources."

The department works to assure the wisest choice in managing all resources so each will make its full contribution to a better United States - now and in the future.
